Week Number

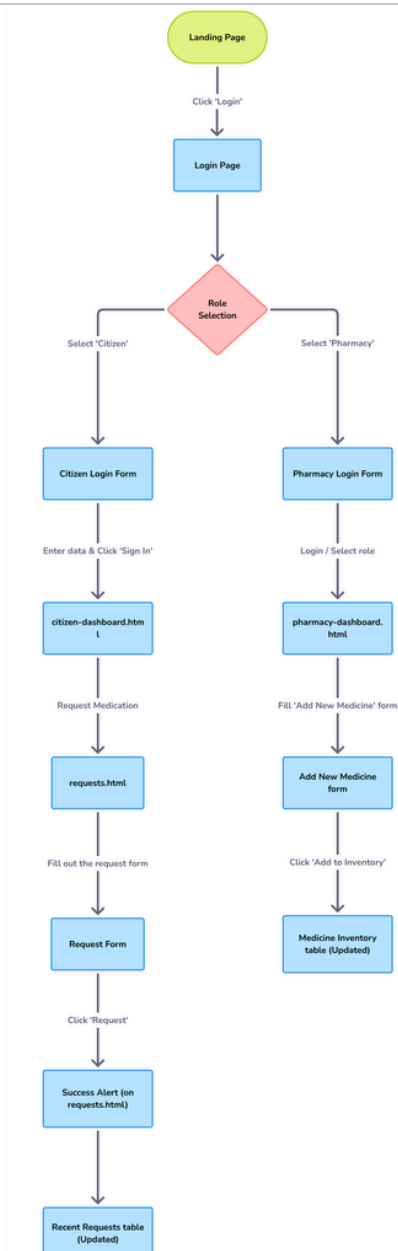

Work completed this week

We designed the UI wireframes for the main pages of the system, including the Landing Page, Login/Register pages, Citizen Dashboard, Pharmacy Dashboard, and Admin Dashboard.

We also created a user flow diagram to illustrate how different users navigate through the system.

User Flow

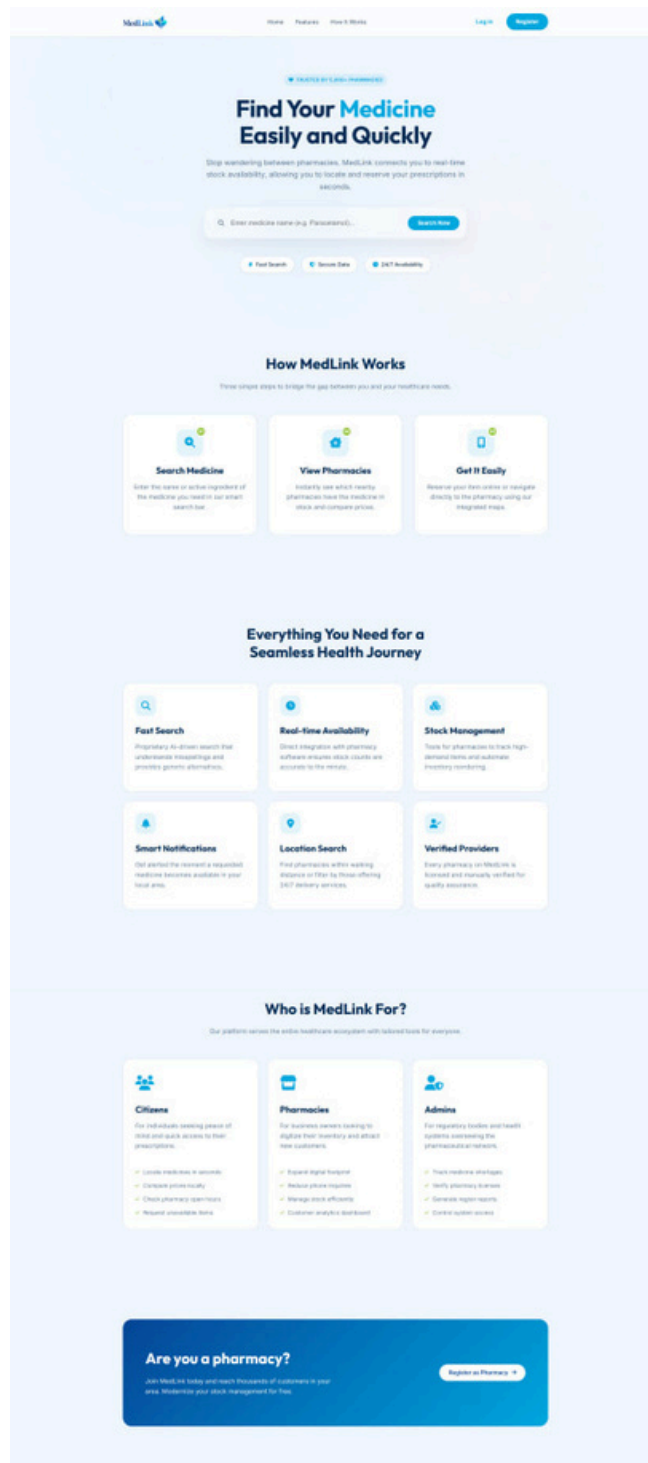

This diagram illustrates how users navigate through the system starting from the landing page to login and role selection.

Based on the selected role (Citizen or Pharmacy), users are directed to their respective dashboards where they can perform actions such as requesting medication or adding new medicines.

Landing Page wireframe design

Login and Register pages design

Secure Verification

All pharmacies are verified by medical boards to ensure drug safety and authenticity.

**Certified Sources**

We only partner with licensed providers.

**Encrypted Data**

Your health information stays private.

Reliable Medicine Sourcing

Connect directly with verified pharmacies or help patients find their prescriptions faster.

**Verified Stocks**

**Partner Pharmacies**

Welcome Back

Access your dashboard to manage prescriptions, track requests, and communicate with health providers.

**Live Tracking**

Check the status of your medicine requests in real-time.

**Smart Notifications**

Get instant alerts when a pharmacy responds.

Create Your Account

Join MedLink to find or provide medications

1 Account Type

2 Your Info

**Citizen**

Search for medications and request unavailable ones from nearby pharmacies.

**Pharmacy**

Manage your medications, update stock, and respond to citizen requests.

Problems encountered

-
- ✔ We faced some challenges in organizing the layout for different types of users (citizen, pharmacy, admin) and ensuring a clear and simple user experience.

Solutions applied

-
- ✔ We simplified the interface design by focusing on essential components and separating each user role with a clear and dedicated dashboard.

Plan for next week

We will implement the designed wireframes into static HTML pages, including all main interfaces.

We will also add the required form elements (inputs and buttons) and organize the project into structured folders.

Questions for Instructor

Is the current UI design clear and user-friendly, or would you recommend any improvements?
